

## **AMENDMENTS TO THE SPECIFICATION**

### **BRIEF DESCRIPTION OF DRAWINGS**

Paragraph 15 amend to:

FIG. 8 is a front plan view of the alternate exemplary embodiment of FIG. 7 in a closed position; ~~and~~

Paragraph 16 amend to:

FIG. 9 is a perspective view of an alternate exemplary embodiment of the present invention including a document clip member; and.

Add new paragraph after 16 to say:

FIG. 10 is a front plan view of a support member with additional optional features that may be included in an exemplary embodiment of the present invention.

### **DETAILED DESCRIPTION OF THE INVENTION**

Amend paragraph 35 with the following:

In addition, as depicted in FIG. 10, a variety of features may be added to the device so that the device may perform additional functions related to the target customer of the device. For example, a ruler 1004 may be drawn on one of the edges of the support member 100, or on one of the sides of the shelf member 200. Similarly, the support member 100 may include a cut out section 1002 for a gage or measuring device (e.g., a leveling device is depicted in FIG. 10) for measurements that are commonly made by the target customer. In addition, the device may include a light 1008 for illuminating the

document or for use as a flashlight. The light 1008 may be built in as part of the device (e.g., at the top edge 110 of the support member 100, on top of the shelf ledge 220) or it may be removably attached to the device. Another feature that may be added to the support member 100 is a retractable extension to accommodate tall documents. Tracks may be added to the back surface 118 of the support member 100 with a locking mechanism to keep the extension in an extended or non-extended position. Another feature that could be incorporated into the device is a compact calculator 1006 on the support member 100. The previous list of additional features is meant to be descriptive and not limiting as other additions are possible and depend on target customer requirements.
